Colorado Department of Health
4300 Cherry Creek Dr South
Denver CO 80222-1530

Dear Mr Baughman

This letter is in response to your correspondence received May 20, 1994, on the issue of the transfer of East Landfill Pond water to Pond A-3 to enable the installation of a leachate collection system for the landfill under the Operable Unit (OU) 7 Interim Measure/Interim Remedial Action (OU-7 IM/IRA) In that correspondence, you stated that the Colorado Department of Health (CDH) believes that the East Landfill Pond water must meet Segment 4 standards before transfer to Pond A-3, so that Segment 5 water would not be diluted to meet Segment 4 standards before that water is eventually discharged to Segment 4 through Pond A-4

The Department of Energy (DOE) will meet Segment 4 water quality standards for transfer of water from the East Landfill Pond to Pond A-3 However, DOE does not agree with the determination that the East Landfill Pond is in Segment 4, or that Segment 4 water quality standards strictly apply The DOE's position is premised on the implication that CDH may be inadvertently resegmenting the tributaries on plantsite which is inconsistent with the final ruling of the Colorado Water Quality Control Commission dated February 15, 1990

The DOE will sample the East Landfill Pond prior to the planned transfer of that water to Pond A-3 in order to address CDH concerns at this time Additionally, DOE will submit the water quality results to CDH The protocol for transferring East Landfill pond water will also be incorporated into the final Pond Water Management IM/IRA

If you have any questions concerning this issue, please contact me at 966-2273, or Gail Hill at 966-3424
